Peng Zan

7562 Elioak Ter, Gaithersburg, MD 20879
zanpeng.pz@gmail.com (240)755-2606

EDUCATION

Ph.D., Electrical and Computer Engineering — 12/2019
University of Maryland, College Park, MD — GPA 3.6

M.Sc., Electrical and Computer Engineering — 08/2019
University of Maryland, College Park, MD — GPA 3.8

B.Sc., Electrical Engineering — 07/2014
Xi'an Jiaotong University, Xi'an, China — GPA 90/100

Exchange, Electronic Engineering — 05/2013
Chinese University of Hong Kong, Hong Kong, China — GPA 3.7

WORK EXPERIENCE

Sr. Software Engineer - AI Framework — 08/2021-present
Black Sesame Technologies, San Jose — CA

Principal Scientist — 02/2021-06/2021
Origin Wireless AI, Greenbelt — MD

Principal Data Scientist — 02/2020-02/2021
Origin Wireless AI, Greenbelt — MD

DSP Research Intern — 05/2019-08/2019
Starkey Hearing Technologies, Eden Prairie — MN

Graduate Research Assistant — 08/2015-05/2019
University of Maryland, College Park — MD

Graduate Teaching Assistant — 08/2014-05/2015
University of Maryland, College Park — MD

INTEREST

Signal Processing, Mathematical Optimization, Auditory & Acoustics

PROJECTS

ADAS Chip Compiler Optimization — 08/2021 - present
AI Framework Research, Black Sesame Tech. — AI Framework Tool Team

- Identified factors affecting quantization accuracy and improved quantization accuracy by about 20%.
- Designed and optimized neural network quantization processes on autonomous driving chip using mathematical modeling and convex optimization, boosting mass production of next-generation chip.
- Designed graph partition and memory allocation algorithms to improve SoC performance.

WiFi Sensing and Internet of Things (IoT) — 02/2020 - 06/2021
WiFi-Sensing for Home Security and Indoor Activity Monitoring — Algorithm Team, Origin Wireless AI

- Researched and developed real-time algorithm for indoor motion and breathing localization using WiFi sensing based on *statistical electromagnetic field models*.
- Designed and optimized indoor activity monitoring algorithms for HEX Home, our home security and activity monitoring system (CES 2021 Innovation Award), based on *a sequential decision model*.
- Collaborated with companies such as Verizon, Alarm.com and Belkin to turn research into commercialized products.

WiFi-Sensing Production Automation — Hardware Team, Origin Wireless AI

- Designed and automated manufacture workflow for WiFi-sensing products by Python.
- Boosted production rate from one per hour to 10-12 per hour.
- Supported Verizon Communications Inc. with quality products and visualization tools built by Python.

Real-Time Tracking with IMU Sensors on Mobile Devices — Algorithm Team, Origin Wireless AI

- Developed a real-time tracking system with sub-meter accuracy based on a *Bayesian dynamic model on graph*.
- Developed Android and iOS App for Origin Tracking product - work without WiFi.

DNN-based Speech Enhancement — 06/2019 - 08/2019
Signal Processing Research, Starkey — Internship research

- Designed and conducted subjective listening experiment to test DNN-based speech enhancement algorithms.
- Analyzed experimental data and compared DNN algorithms.

Joint Approach of Auditory Attention Decoding and Speech Enhancement [C1] — 05/2019 - 08/2019
Signal Processing Research, Starkey — Internship research

- Designed and conducted electroencephalography (EEG) experiment to simulate a cocktail party scenario.
- Collected auditory responses while subjects switch attention from one speaker to another.
- Developed an *EEG guided Beamforming model* for joint approach of attention decoding and speech enhancement.

Mutual Information Analysis of Auditory Brain Responses and Effects of Aging [J1][J2] — 01/2018 - 05/2019
Computational Sensorimotor Systems Lab, UMD — Thesis research

- Developed a novel approach based on information theory to decode phase-locked response from M/EEG recording.
- Revealed speech over-representation in the aging midbrain [J2] and cortical [J1] marker of behaviors.
- Algorithm programmed in Matlab, source-space analysis done in Python and statistics conducted in R.

Machine Learning Applications in Auditory Research [J3][J4] — 06/2017 - 12/2017
Computational Sensorimotor Systems Lab, UMD — Independent research

- Implemented KNN and CNN for schizophrenia detection based on auditory steady-state response features (code).
- Designed and compared neural decoders based on maximum likelihood estimation, linear regression and neural network to study adaptive efficient coding of correlated acoustic properties in auditory cortex of ferret [J3].
- Developed object and edge detection approach to extract pupillometry information from video recordings to study implicit memory for complex sounds in auditory cortex of ferret [J4].

SKILLS

Programming: Python (expert), C/C++, R
Software Tools: Matlab (expert), SPSS, MNE-Python, Eelbrain, Tensorflow, Pytorch, LaTeX, Git (Github), Linux/Unix
Software Engineering: Algorithms and Data Structure (Certificate), App Development, System Automation
Data Science: Statistics, Machine Learning (Certificate), Deep Learning (Certificate)
Data Engineering: Database, SQL
Research: Auditory Neuroscience Experiment Design, Electroencephalography (EEG), Magnetoencephalography (MEG)

SELECTED AWARDS & HONORS

Starkey Recognition Award	Starkey, 08/2019
COMBINE Traveling Award	UMD, 12/2018
NSF-Funded COMBINE Fellowship (Computational Biological Network Program)	UMD, 09/2017
Jimmy H. C. Lin Graduate Scholarship for Entrepreneurship	UMD, 09/2014
ECE Ph.D. Fellowship Award	UMD, 09/2014
National Scholarship, Ministry of Education of the P.R.C.	XJTU, 11/2011
